Professional Summary

Software Developer from Gandhinagar, Gujarat, India with a Computer Science background from Parul University. Hands-on experience building ASP.NET web applications, REST APIs, SQL Server-backed systems, and responsive interfaces. Recently completed an 8-month tenure as a Software Developer at Moneycure Securities & Financial Services Ltd. and currently focused on freelance .NET web development for reliable backend solutions.

Experience

Moneycure Securities & Financial Services Ltd. 8 Months
Software Developer Gujarat, India

- Contributed to business web application development in an ASP.NET-based environment with a focus on reliable backend functionality.
- Worked on API integration, SQL Server data handling, debugging, and internal feature improvements for daily operational workflows.
- Supported testing, issue resolution, and collaborative development tasks to improve application usability and maintainability.

Projects

CRM-ERP 2026
.NET 8, ASP.NET Core Web API, EF Core 8, Next.js 15, React 19, TypeScript, Tailwind CSS, Docker

- Built a monolithic CRM/ERP system with an ASP.NET Core Web API backend (EF Core 8, SQLite, JWT Bearer authentication, Swagger) and a Next.js 15 App Router frontend (React 19, TypeScript, Tailwind CSS, shadcn/ui-style components on Radix UI primitives).
- Containerized the full stack with Docker and Docker Compose for consistent local development and deployment.

Car Rental ERP 2026
ASP.NET Core Web API, C#, SQL Server, Entity Framework Core, JWT

- Built a backend-driven ERP solution for customer records, bookings, operational workflows, and admin-facing modules.
- Structured APIs, validation, and data access layers to keep business logic organized, scalable, and ready for frontend integration.

Scroll Animation Lab 2026
Next.js, React Three Fiber, Three.js, GSAP, Lenis, Tailwind CSS

- Built a set of scroll-driven 3D and motion experiments combining React Three Fiber/Three.js scenes with GSAP-timed animations.
- Used Lenis for smooth scrolling and custom shaders to explore interactive, performance-conscious scroll effects.

CryptoHub 2024
React, Chakra UI, JavaScript, CoinGecko API

- Created a responsive cryptocurrency platform with live market data, search, multi-currency views, and interactive price sections.
- Focused on clean UI structure, reusable frontend components, and fast navigation across desktop and mobile layouts.

Education

Bachelor of Technology in Computer Science, Parul University 2021 - 2025
Computer Science background with a strong interest in backend engineering, scalable web systems, and practical product development.

Current Focus

Open to freelance .NET web development projects involving backend systems, APIs, business tools, and dependable SQL Server-backed application workflows.

What I Can Build

- Full web applications using ASP.NET Core MVC and modular backend architecture.
- REST APIs for web and mobile platforms with clean routing, validation, and database integration.
- SQL Server-backed internal tools, CRM workflows, and business process automation.
- UI and UX planning in Figma with wireframes and prototypes before development begins.
- SaaS-oriented application planning with multi-tenant thinking and scalable structure.

Technical Skills

Programming Languages: C#, JavaScript, TypeScript, SQL, HTML/CSS, Python, Java, C++

Backend: ASP.NET Core, ASP.NET MVC, Web API, REST API Design, Entity Framework Core, JWT Authentication, Swagger/OpenAPI

Frontend and Mobile: React, Next.js, React Native, TypeScript, Tailwind CSS, shadcn/ui, Radix UI, Three.js, React Three Fiber, GSAP, Responsive UI Design, JavaScript

Databases: SQL Server, SQL Server Management Studio, SQLite

UI and UX: Figma, Wireframing, Prototyping, User Flow Design

Tools and Platforms: Git, GitHub, Postman, Visual Studio, VS Code, Docker, Docker Compose, Zoho CRM

Architecture: SaaS Product Planning, Multi-tenant Design, Monolithic Architecture, Clean Architecture, Microservices Basics
